JUNJIE HUANG

▪ +86 180-1771-0163 ▪ huangjunjie2019@sjtu.edu.cn

EDUCATION

Shanghai Jiao Tong University (SJTU) **Shanghai**
Ph.D. in Computer Science and Technology *Sept 2023 – Jun 2028*

- **Ph.D. GPA:** 3.87/4.00; Received top grades in multiple courses: Machine Learning, Financial Service Computing, Neural Network Theory and Applications, Natural Language Understanding, etc.
- **Research Interests:** Supervised by Prof. Weinan Zhang and Prof. Yong Yu (APEX Lab)
  Focusing on Large Language Models, AI Agents, Information Retrieval, and Recommender Systems
  Published 7 papers in CCF-A top conferences/journals, including 4 first-author papers

Shanghai Jiao Tong University (SJTU) **Shanghai**
B.Eng. in Artificial Intelligence, Elite Talent Program *Sept 2019 – Jun 2023*

- **English Proficiency:** CET-4 659, CET-6 629

HONORS & AWARDS

- 2025 **Ph.D. National Scholarship**; 2024 & 2025 SJTU Merit Student
- 2023 SJTU Outstanding Graduate; 2022 China Optics Valley Scholarship
- 2020 **Undergraduate National Scholarship (ranked 1st out of 76)**
- 2020 **First Prize, National College Mathematics Competition**; 2019 First-Class Freshman Scholarship
- Multiple SJTU Academic Excellence Scholarships; Merit Student; Excellent League Member

Additional: CFA Level I passed | Selected for **2026 Jiaqi Quant Winter Camp** (Top 2%-3%)

INTERNSHIP EXPERIENCE

Tencent | Youtu Lab | Algorithm Research Intern *Jun 2025 – Present*

- Developed a reinforcement learning-guided pre-training framework for large language models
  - Deployed the framework in internal models, **improving average performance by 1.5% across 15 downstream tasks**; the work led to **a granted patent** and a paper under submission to ICML 2026
- Contributed to the **Tencent Youtu-LLM technical report**, which was featured on the homepage of ModelScope

China Merchants Bank Credit Card Center
Algorithm Research Intern *Jul 2021 – Sept 2021; Feb 2024 – Sept 2024*

- Surveyed and analyzed retrieval methods used in recommender systems across academia and industry
  - Published the resulting survey in the CCF-A journal TOIS
- Explored multi-channel retrieval fusion mechanisms in recommender systems, improving fusion from heuristic design to systematically optimized weighting
  - Published the work at The Web Conference 2025 (WWW 2025), where it received a **Student Travel Award**
  - Deployed the model in the CMB Smart Living recommendation scenario with millions of Daily Active Users (DAUs), **increasing the Click-Through Rate (CTR) by 17%**
- Participated in research on user long-term behavior sequence modeling, with results published in WWW 2022

Huawei | Noah's Ark Lab | Algorithm Research Intern *Jul 2022 – Feb 2023*

- Researched ranking methods and user behavior retrieval for recommender systems
  - Published the resulting work at KDD 2023 and WWW 2024

PUBLICATIONS (GOOGLE SCHOLAR)

First Author (4 CCF-A):

- **Junjie Huang**, Jiarui Qin, et al. Unleashing the Potential of Multi-Channel Fusion in Retrieval for Personalized Recommendations. *In Proceedings of the ACM Web Conference 2025.* ***WWW 2025 oral***
- **Junjie Huang**, Jizhen Chen, et al. A Comprehensive Survey on Retrieval Models in Recommender Systems. *ACM Transactions on Information Systems.* ***TOIS***
- **Junjie Huang**, Jiarui Qin, et al. Beyond Graph Convolution: Multimodal Recommendation with Topology-aware MLPs. *In Proceedings of the AAAI Conference on Artificial Intelligence 2025.* ***AAAI 2025***
- **Junjie Huang**, Guohao Cai, et al. Recall-Augmented Ranking: Enhancing Click-Through Rate Prediction Accuracy with Cross-Stage Data. *In Companion Proceedings of* ***WWW 2024***

Other Publications:

- The Youtu-LLM Team (including **Junjie Huang**). Youtu-LLM: Unlocking the Native Agentic Potential for Lightweight Large Language Models. **Tencent Youtu-LLM Technical Report**
- Jiarui Qin*, Yunjia Xi*, **Junjie Huang**, et al. APTBench: Benchmarking Agentic Potential of Base LLMs During Pre-Training.
- Jieming Zhu*, Guohao Cai*, **Junjie Huang**, et al. ReLoop2: Building Self-Adaptive Recommendation Models via Responsive Error Compensation Loop. *In Proceedings of the 29th ACM SIGKDD Conference on Knowledge Discovery and Data Mining.* ***KDD 2023***
- Zhengbang Zhu, Rongjun Qin, **Junjie Huang**, et al. Understanding or Manipulation: Rethinking Online Performance Gains of Modern Recommender Systems. *ACM Transactions on Information Systems.* ***TOIS***
- Jiarui Jin*, Xianyu Chen*, Weinan Zhang, **Junjie Huang**, et al. Learn over Past, Evolve for Future: Search-based Time-aware Recommendation with Sequential Behavior Data. ***WWW 2022***

LEADERSHIP & SERVICE

Student Work:

- Served as Class Youth League Secretary during both undergraduate and doctoral studies at SJTU
- Held leadership roles in the Graduate Student Union and SEIEE student organizations
- Participated in the project "Assisting Heroes, Sharing the Storm: Deep Learning-Based Disaster Relief Support," which was selected as one of SJTU's **Top 10 Social Practice Project**

Academic Services:

- Reviewer for top conferences/journals: ACM MM, WWW, AAAI, ICML, TKDE
- Teaching Assistant for Graduate Course CS7309: Reinforcement Learning Theory and Algorithms, SJTU, 2026
